Livia (58 BC-29 AD), the wife of the first Roman emperor, Caesar Augustus, and mother of the second, Tiberius, wielded power at the centre of Roman politics for most of her long life. Livia has been portrayed as a cunning and sinister schemer, but in this biography (the first in English devoted to her) Livia emerges as a much more complex individual. Achieving influence unprecedented for a woman, she won support and even affection from her contemporaries and was widely revered after her death. Anthony A. Barrett, author of acclaimed biographies of Caligula and Agrippina, here examines Livia's life and her role in Roman politics. He recounts the events of her life, from her early days as a member of the wealthy and powerful Claudian family through her final conflicts with the new Emperor Tiberius. Barrett also considers how Livia helped shape the pattern of Roman government that prevailed for the next four centuries. - Dust jacket (450) \$35.00

The course that Athens followed can be to us not only a record of old unhappy far-off things, but a blueprint of what may happen again." "His History of Ancient Greece, its Colonies and Conquests was published in 1786; it was translated into French and German. This work was written with a strong monarchist bias. See for instance the opening 'dedication to the king': 'The history of Greece exposes the dangerous turbulence of democracy, and arraigns the despotism of tyrants. By describing the incurable evils inherent in every form of Republican policy, it evinces the inestimable benefits resulting to liberty itself from the lawful dominion of hereditary kings, and the steady operation of well-regulated monarchy'." --Wikipedia (893)
